

BR50010D

## Danger Safety Barrier Reel

April 2021

The Alemlube BR50010D Danger Safety Barrier Reel is an innovative storage and retrieval system containing 16 metres of red/white safety band designed to provide a temporary visual barrier to clearly identify hazardous or dangerous areas in the workplace and around public areas.

The durable, long lasting red/white safety band is complete with a fixed-handle that easily attaches to any suitable fixing point up to 16 metres from the reel.

A robust plastic outer casing contains an automatic spring rewind mechanism that efficiently rewinds the safety band for storage after use and the reel can be mounted/demounted via the integral swivelling steel wall bracket.

Always good to have on hand, the BR50010D Danger Safety Barrier Reel available from Alemlube is a cost effective, user friendly, compact design reel and a must for addressing workplace and employee safety.

Typical applications include automotive workshops, mine site stores, industrial loading docks, office block car park entrances and commercial warehouses.
