001021-12 10L Oil Container with 12mm Pour Lid Kit

Oil contamination is a leading cause of machinery failure by directly impairing the lubricant's ability to control friction, wear and corrosion. The 001021-12 iCan™ 10L oil container with 12mm pour lid kit reduces the chance of lubricant cross contamination and subsequently machinery failure. The quick fill port helps to minimise foreign particle ingress during container refilling and the threaded port on the lids provides the option to add a desiccant filter for added protection.

The user friendly design features an innovative on/off toggle switch that makes dispensing the fluid a breeze. The square base on the 001021-12 iCan™ 10L oil container results in greater stability and the unique colour coding enables quick and easy lubricant identification. iCan™ HDPE lids and containers won't rust, warp, distort or break and therefore are a must for people who see value in operating and presenting a modern, professional and organised workshop.

The 001021-12 iCan™ 10L oil container with 12mm pour lid kit helps to deliver best practice lubricant storage, identification and dispensing processes for a variety of HDPE compatible lubricants, fluids and coolants.

Included with the 001021-12 iCan™ 10L oil container with 12mm pour lid kit iCan™ is a clear plastic iPouch containing a set of 5 double sided colour coded iCards to assist in the easy identification of lubricants.

001520 ITags Pour Lid Handle Set
Set of 10 Colours and a set of 5 double
sided colour coded iCards

PRODUCT SPECIFICATIONS, FEATURES AND BENEFITS

- Fully sealed system reduces the chance of lubricant contamination
- Colour coding accurately identifies fluids to minimise cross contamination
- On/off toggle switch for easy dispensing
- Quick fill port for safe contaminant free refills
- Threaded port with optional desiccant filter for added protection
- Rugged & sturdy design
- HDPE construction with UV & anti static resistant qualities
- Supplied standard with lubricant identification cards
- Large flat square base surface for stability and easy iPouch labelling for MSDS documents
- Quick changing colour coding handles and bands means no more stocking of specific coloured pour lids saving time and money

iCards

001120 & 001137 iPouch
