

14513 Heavy Duty 4 Jaw Grease Gun Coupler

September 2019

The Alemlube 14513 Heavy Duty 4 Jaw Grease Gun Coupler is an industrial quality grease coupler for use with standard hydraulic grease nipples. Manufactured in Germany, the 14513 features punched jaws designed specifically for superior sealing and an exceptionally long service life.

With a working pressure of up to 12,000psi (827bar) the 14513 grease gun coupler is suitable for use with all metric (DIN) and SAE specification hydraulic grease nipples and works with all grease gun types including manual, pneumatic and battery powered grease guns.

At just 33.00mm long and 15mm wide the 14513 Heavy Duty 4 Jaw Grease Gun Coupler's compact design enables access to difficult to reach lube points.

SPECIFICATIONS, FEATURES AND BENEFITS

- Industrial quality 4 jaw coupler for standard hydraulic grease nipples
- Working pressure up to 12,000 psi (827bar)
- 1/8" BSPF thread
- Works on all metric (DIN) and SAE specification hydraulic grease nipples
- Four hardened steel punched jaws long life performance
- Works with all grease gun types: manual, pneumatic and battery powered grease guns
- Compact design enables access to difficult to reach lube points
- 13mm spanner slot assists during coupler replacement
- Designed and manufactured in Germany for heavy duty industrial applications
