APRIL 2017 Update

680AN

Air Operated Grease Gun - 450g

The 680AN air operated 450 gram cartridge grease gun gives the user the choice of delivering a single shot or a continuous flow of grease. The well-balanced ergonomic design of the 680AN ensures fast and efficient greasing at pressures of up to 3,290psi and can empty a 450 gram cartridge in around two and a half minutes.

The 680AN air operated grease gun can also be converted to allow filling from a bulk grease container or a filler pump and features an innovative and effective follower cup, a grease gun loader fitting and an air bleed valve.

PRODUCT SPECIFICATIONS, FEATURES AND BENEFITS

Develops grease pressures up to 3,290psi

Pressure ratio of 40:1

Delivers up to 182 grams per minute

Recommended maximum air pressure of up to 98psi

Suits 450g cartridge or bulk grease

Continuous flow or single shot operation

Suitable for use with grease up to NLGI2

Flexible extension length of 50cm

Weight of 1.4kg
