# BC110010

## Brake Cleaner Sprayer - 1 Litre

The Alemlube BC110010 brake cleaner sprayer has a capacity of 1L and comprises a polyethylene container with wide opening for easy filling, a Viton seal which is resistant to certain chemicals and an easy action ergonomic trigger.

Particularly suitable for spraying non-chlorinated brake cleaning solution, the BC110010 is also useful for containing and spraying general detergents, disinfectants, common pesticides, insecticides and water.

Featuring a sprayer head with an adjustable brass nozzle that sprays from a fine mist to a jet stream and can close completely after use to avoid accidental fluid loss, the BC110010 is manually air pressurised with an easy pump action and addresses important safety guidelines by incorporating a pressure relief valve.

The BC110010 brake cleaner sprayer with its stable design is ideal for a variety of cleaning applications in automotive and industrial workshops, agriculture, plant & environmental protection and uses around the home. 2 Litre version also available (BC110020).
