SJ-110-006

Stackable 4 Drum Spill Container

Alemlube has upgraded its drum spill container range with the introduction of the SJ-110-006 stackable 4 drum spill container.

The space saving design, due to its storage / stackability benefits is more than ever today's most convenient and user friendly spill containment system suitable for use with a variety of containers and drums up to 205L.

Accommodating up to 4 x 205L drums, the innovative SJ-110-006 has a generous storage area of 1.8m² and a platform with hand inserts and holes for inspection and pump insertion.

Compatible with most forklifts and pallet trucks, the SJ-110-006 is manufactured from 100% recyclable UV resistant PE, is fully recyclable, chemical resistant and has a fluid capacity of 236 litres to the underside of the platform.

Alemlube's entire spill containment range assists in addressing OH&S concerns and helps to create a safer, more functional workplace.
