December 2015

# SJ-510-001

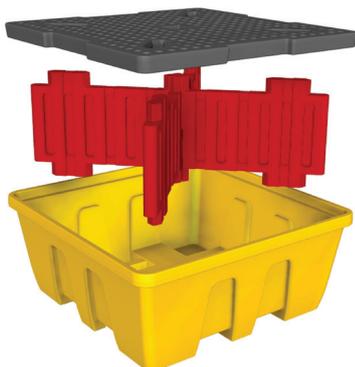

## 1,000L IBC Spill Container

The SJ-510-001 1,000L IBC spill container is today's most convenient and user friendly spill containment system suitable for an IBC or multiple small containers. Manufactured from 100% recyclable polyethylene the SJ-510-001 has a capacity of 1,250 litres (1,180 litres to underside of the deck) and features a non-skid removable deck inclusive of hand inserts for ease of lifting and multiple holes for inspection and pump insertion when required.

Designed for static spill containment, the SJ-510-001 1,000L IBC spill container is compatible with most forklifts and pallet trucks and provides excellent chemical resistance.

Excellent storage and stacking ability facilitates efficient transportation of the SJ-510-001 whether from one side of the factory to another or to another site.

It is recommended that an IBC and/or drums be removed prior to forklifting the spill container to a different location.

### PRODUCT SPECIFICATIONS, FEATURES AND BENEFITS
