DIRECTIONS FOR USE:

1. Start vehicle engine.
2. Set fan at low speed.
3. Turn A/C ON and set temperature at around 22°C or normal driving comfort temperature.
4. Set air flow through centre dashboard vents only.
5. Set to Recirculate mode. Close all windows.
6. Shake can well before use.
7. Place can upright on the floor of the vehicle's front passenger seat, underneath the suction air vent, ensuring can is NOT pointing upwards towards the windscreen.
8. Keeping away from body & face, ACTIVATE can by pressing the nozzle down until it is locked.
9. EXIT CAR and CLOSE DOORS. DO NOT REMAIN IN VEHICLE CABIN.
10. Leave for 10 minutes.
11. Open windows and ventilate for 10 min prior to vehicle entry.

AirCon Kleen™

UNPLEASANT ODOURS IN YOUR VEHICLE CAN START FROM TWO DIFFERENT SOURCES.

1st source can start from the items you place or store in your vehicle e.g. shoes, gym clothes, food wrappings, forgotten fruit, pets etc.

2nd source is the Bacteria, mould and mildew that slowly grows and lurks in your car's air-conditioning system, causing allergic reactions and unpleasant stale

odours. When you switch your air conditioning ON, bacteria spores are pushed out from the vents and recirculated inside your vehicle cabin.

Traditional car air fresheners and scented cardboard cut outs cover up odours with a strong fragrance but the source remains untouched.

Chemtech AirCon Kleen™ does not mask odours it eliminates them right at the source in just 10 minutes!

Simply press down on the locking nozzle to release the antibacterial, deodorising fog mist with a fresh citrus fragrance.

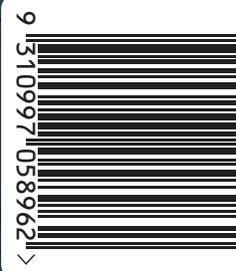

Formulated to deodorise & disinfect the heating, ventilation and air conditioning system and freshen the vehicle's interior by eliminating bacterial and fungal growth.

FRESH
Citrus Scent

Product Code: ACK-150G
Size: 150G
